Hawaii Excelsior Hotel  
August 4th, 2012

Dear Marry,

How are you? Have you finally found a new flat? And how was your holiday?

I'm writing to you from Hawaii. I came a week ago and stayed with my friend, Caroline, in a luxurious hotel called Excelsior Hotel. We had a spacious, comfortable room with a large terrace overlooking the ocean.

Yesterday, we started learning surfing. We really enjoyed it and the instructor said we were doing quite well. I started scuba diving course three days ago and tomorrow I'm going to dive in the ocean for the first time. I'm very excited about it!

That's all for now, I must rush for a spectacular party tonight.

Take care,  
Jessica

#### Raja Ampat Island

Raja Ampat is located in the northwest tip of Bird's Head Peninsula of West Papua. It is an archipelago comprising over 1,500 small cays and shoals surrounding the four main islands of Misool, Salawati, Batanta, and Waigeo, and the smallest island of Kofiau.

Raja Ampat is the most bio-diverse location in the world. More than 3000 species of fish and over 300 species of corals have been identified here. In a single one and half hours dive we can see more than 400 species of fish. Until today, the area is virtually unexplored and unknown due to its size. From mid-June to the end of August, Raja Ampat area has its roughest seas and lowest visibility. During the rest of the year, the sea is mostly very smooth with good visibility.

The marine natural resources in Raja Ampat make it significantly potential as a tourist destination. Many travel agents place Raja Ampat as one of their top ten diving destinations while it ranks number one in underwater biodiversity. The International Marine Conservation surveys suggest that the marine life diversity in the Raja Ampat area be the highest recorded on Earth. It is greater than any other area sampled in the Coral Triangle composed of Indonesia, Malaysia, Philippines, Papua New Guinea, Solomon Islands, and Timor-Leste. The Coral Triangle is the heart of the world's coral reef biodiversity, making Raja Ampat possibly the richest coral reef ecosystems in the world.

18. How many species of corals have been identified in Raja Ampat?
- A. less than 300.
  - B. more than 300.
  - C. more than 400.
  - D. over 1500.
19. Which information is found in the text?
- A. Due to the size, the area has been known and explored.
  - B. The marine life diversity in Raja Ampat is the lowest on earth.
  - C. The sea is very rough and decreases in visibility every August.
  - D. The coral triangle is the heart of the world's coral reef biodiversity.
20. What is the main idea of the last paragraph?
- A. Raja Ampat is a potential tourist destination
  - B. Raja Ampat is a sampled area in the Coral Triangle
  - C. Raja Ampat is a bio-diverse location in the world
  - D. Raja Ampat is an archipelago comprising 1.500 islands

**The following text is for questions 22 to 26.**

Becaks were banned within the Jakarta city limits in 1994. At that time, former President Soeharto wanted to eradicate becaks from the city streets because they caused traffic problems. However, you can find an occasional becak driver in certain locations within Jakarta. Becak can also be found at the junction of main roads and smaller country lanes.

Becak are widely missed by people who live in housing complexes off the main roads and small roads which are not serviced by bus routes – as their means of transportation. A becak seats two passengers. If we want to ride it with more comfort, choose the one with a plastic sheet that protects passengers during rain. Bargain before you get in and prepare some small change to pay.

22. The text tells us about ... in Jakarta.
- becaks as public transportation
  - the passengers of becaks
  - the new becak fare
  - the way to take a becak
23. Who eradicated becak from the city?
- People in the housing complex.
  - Former President Soeharto.
  - Becak drivers in Jakarta.
  - All people in the city.
24. What is the reason to eradicate becaks?
- There are other transportations to replace them.
  - They operated in country lanes and main roads.
  - They caused many traffic problems on the streets.
  - They required bargaining and small change when paying.
25. What is the second paragraph about?
- The reason why people like becak.
  - Tips in riding becaks for women.
  - The becak fare that people have to pay.
  - The routes of becaks in Jakarta.
26. From the text, we can conclude that ....
- the president eliminated becak successfully
  - many people love to ride becak
  - becak riders were happy to stop
  - people always use becak everywhere

Charles Robert Darwin was an English scientist, who proposed and provided evidence for the scientific theory that all species have evolved through natural selection. This theory became widely accepted by the scientific community in the 1930s, and now become the basic of modern evolutionary theory.

Darwin developed his interest in natural history at Edinburgh University while studying first medicine, then theology. His five-year voyage on the Beagle established him as a geologist whose observations and theories supported Charles Lyell's uniformitarian ideas, and publication of his journal of the voyage made him famous as a popular author.

His study on the geographical distribution of wildlife that he collected during the voyage, resulting his theory of natural selection in 1838. Having seen other being attacked for similar ideas, he confided only to his closest friends and continued his research. In 1858, Alfred Russel Wallace sent him an essay describing a similar theory, causing the two to publish their early theories in a joint publication. In 1859 He published his famous book, the Origin of Species.

**The following text is for questions 35 to 38.**

There was a little boy who had a bad temper. His father gave him a bag of nails and told him that every time he loses his temper, he must hammer a nail into the fence.

The first day the boy had driven 37 nails into the fence. Over the next few weeks as he learned to control his anger, the number of nails hammered daily, gradually dwindled down. He discovered it was easier to hold his temper than to drive those nails into the fence. Finally the day came when the boy didn't lose his temper at all. He told his father about it and the father suggested that the boy should pull out one nail for each day that he was able to hold his temper.

The days passed and the young boy was finally able to tell his father that all the nails were gone. The father took his son by the hand and led him to the fence. He said "You have done well, my son, but look at the holes in the fence. The fence will never be the same. When you say things in anger, they leave a scar just like this one."

You can put a knife in a man and draw it out. It won't matter how many times you say I'm sorry, the wound is still there.

35. Why did the boy drive fewer nails into the fence than he did before?
- A. The number of nails he got was limited.
  - B. He had been able to control his anger.
  - C. He lost his temper when he nailed the fence.
  - D. His father suggested that he pulled out the nails.
36. What is the main idea of paragraph 2?
- A. The first day the boy had driven 37 nails into the fence.
  - B. The boy did not lose his temper after hammering the fence.
  - C. It was easier to hold temper than to drive the nails.
  - D. The boy did his father's suggestion to control his temper.
37. What can we learn from the story?
- A. Do not hurt other people's feeling.
  - B. Everyone can get angry, so be careful.
  - C. Do not be angry, because it hurts our heart.
  - D. Making someone angry will hurt you.
38. "... , they leave a scar just like this one." (paragraph 3)

The following text is for questions 39 to 42.

Gardenia plants are popular for the strong sweet scent of their flowers. Gardenia is the national flower in Pakistan. In Japan and China, the flower is called Kuchinashi (Japanese) and Zhi zi (Chinese).

Gardenia plants are evergreen shrubs. Their small trees can grow to 1 – 5 meters tall. The leaves are 5 – 50 centimeters long and 3 – 25 centimeters broad, dark green and glossy with a leathery texture. The flowers are in small groups, white, or pale yellow, with 5-12 lobes (petals) from 5-12 centimeters diameter. They usually bloom in mid-spring to mid-summer. Many species have strong aroma.

To cultivate gardenia as a house plant is not easy. This species can be difficult to grow because it originated in warm humid tropical areas. It demands high humidity and bright (not direct) light to thrive. It flourishes in acidic soil with good drainage and thrives on 20° – 23° C during the day and 15° – 16° C in the evening. Potting soils developed specifically for gardenias are available. It grows no larger than 18 inches in height and width when grown indoor. In climates where it can be grown outdoors, it can reach the height of 6 feet. If water hits the flowers, they will turn brown.

39. How tall is a gardenia tree?
- A. 3 – 25 cm.
  - B. 5 – 12 cm.
  - C. 5 – 50 cm.
  - D. 1 – 5 m.
40. What is the main idea of the last paragraph?
- A. It is easy to plant a gardenia tree.
  - B. A gardenia plant needs high humidity.
  - C. It's not easy to plant gardenia as a house plant.
  - D. A good drainage is important for gardenia plant.
41. From the text we know that ....
- A. people don't like the strong scent of flower
  - B. Gardenia is widespread in Asia
  - C. the flower is easy to plant
  - D. the flower is expensive
42. "... because it originated in warm ..." (paragraph 3, line 10)  
The underlined word refers to ....
- A. the flower
  - B. the species
  - C. the soil
  - D. the leaf
