LADY WHITE AND LADY YELLOW

Once there were two chrysanthemums growing side by side in a field, one white, one yellow. One day a gardener came and offered to take the yellow flower to his home and make her far more beautiful. The yellow flower jumped at this chance and waved to her sister as she was carried away in the gentle hands of the gardener. Day by day, the yellow flower petals grew long and soft and she looked perfect.

One day a man came saying he was looking for a flower to put on the lord's crest. The gardener showed the man his best flower, the yellow chysanthemum. But the man shook his head and said that the flower had too much style and that he wanted something simpler. The yellow flower was disappointed but tried not to dwell on it.

The man crossed the field of the white chrysanthemum. He came up to her and said, "How would you like to be the object on my lord's crest. We would make sure you have a very nice life." Soon she was planted in a small planter by herself on a windowsill in the lord's mansion. The lord and his family agreed it was perfect for their crest. So artisans came and painted the flower on all of the family's belongings.

As for the yellow chrysanthemum, her luxury was short lived. One day she felt a terrible feeling coming through her leaves and then she fell over and lay on the ground. Gardenia plants are popular for the strong sweet scent of their flowers. Gardenia is the national flower in Pakistan. In Japan and China, the flower is called Kuchinashi (Japanese) and Zhi zi (Chinese).

Gardenia plants are evergreen shrubs. Their small trees can grow to 1 – 5 meters tall. The leaves are 5 – 50 centimeters long and 3 – 25 centimeters broad, dark green and glossy with a leathery texture. The flowers are in small groups, white, or pale yellow, with 5-12 lobes (petals) from 5-12 centimeters diameter. They usually bloom in mid-spring to mid-summer. Many species have strong aroma.

To cultivate gardenia as a house plant is not easy. This species can be difficult to grow because it originated in warm humid tropical areas. It demands high humidity and bright (not direct) light to thrive. It flourishes in acidic soil with good drainage and thrives on 20° – 23° C during the day and 15° – 16° C in the evening. Potting soils developed specifically for gardenias are available. It grows no larger than 18 inches in height and width when grown indoor. In climates where it can be grown outdoors, it can reach the height of 6 feet. If water hits the flowers, they will turn brown.
